Hysbysa Asiantaeth yr Amgylchedd Cymru y bwriada wneud gwaith gwella Cored Rhodfa'r Fonesig Bagot ar Glywedog yn ymyl y Rhewl (SJ 10586 59795). **Lady Bagot's Drive Weir – Fish Pass**

Environment Agency Wales gives notice that it proposes to carry out improvement works to the Lady Bagot's Drive Weir on the River Clywedog near Rhewl (SJ 10586 59795). The proposed improvement works will involve the creation of a shallow gradient rock ramp in the river to replace a series of non-functional weirs. This will allow fish to pass over the weirs, which currently create a barrier to migrating fish.

Environment Agency Wales considers that the improvement works are not likely to have significant effects on the environment and does not intend to prepare an environmental statement in respect of them. Environmental aspects will be considered in the scheme design and construction. A Scoping Consultation Document and Environmental Report can be made available to interested parties.

Any person wishing to make representations in relation to the likely environmental effects of the proposed improvement works should do so, in writing, to the address specified below, within 28 days of the date of publication of this notice.
